PROFESSIONAL EXPERIENCE

Freelancer – VA & Workflow Automation Specialist

February 2026 - Present

- Design and implement workflow automations using CRM and work management platforms such as Monday.com and ContactPoint.
- Build and optimize process flows to improve task tracking, lead management, and operational efficiency.
- Configure automation rules, status pipelines, and data structures within CRM systems.
- Support administrative operations including data management, reporting, and coordination with team members.

Freelancer – AI Researcher & Developer

July 2024 – February 2026

- Conduct AI research tasks across multiple client projects, including data analysis, model evaluation/testing, and documentation using Python and basic C++.
- Develop and test AI-based solutions for different use cases, including building AI chatbot prototypes and improving responses through structured prompts and test iterations.
- Build AI agent workflows to automate multi-step tasks and translate findings into clear next steps for clients.
- Prepare technical summaries and reports that clearly explain findings, test results, issues, and recommended actions.
- Support UAV system setup and video/audio detection experiments using embedded devices, including hardware integration and basic functional testing.
- Built and integrated a custom multirotor drone, performed bench and flight-readiness tests, and troubleshoot issues to improve stability.

On-the-Job Trainee – Mechanical Technician

Isuzu Pagbilao (MBT Autoworx Corporation) · July - August 2023

- Performed preventive maintenance and routine servicing (inspection checklists, fluid checks/top-ups, basic replacements) under shop procedures and safety practices.
- Supported senior technicians with diagnostics by preparing tools, helping with teardown and inspection, and recording findings.
- Helped manage tools and parts flow by organizing inventory, preparing job kits, and coordinating basic updates with the front desk/service team.
- Performed post-service checks to confirm basic service quality under supervision.

Student Assistant – Library (EMRC)

Manuel S. Enverga University Foundation · 2023 – 2024

- Managed front-desk support for students and staff, handling requests and basic inquiries.
- Maintained records and documents through organized filing, data entry, and basic data handling.
- Supported school activities like taking photo/video coverage and organizing media files for documentation.
- Operated event equipment, performed pre-event checks and on-site troubleshooting, and coordinated with staff and event users to keep event operations smooth and organized.

PROJECT HIGHLIGHTS

AI Chatbot & Agent Workflow Development (Python)

- Developed chatbot prototypes using structured prompting and testing strategies.
- Built agent-based workflows to automate reporting, data processing, and task execution.
- Evaluated model responses and improved performance through iterative testing.

Basic Software Projects (Java, C++, Python)

- Developed basic applications such as calculators and cashier systems during academic training.
- Applied core programming concepts including conditional logic, loops, and data handling.
- Practiced structured problem-solving and debugging across Java and C++ environments.

Undergraduate Thesis – Automated Water Sprinkler with Railing System

- Designed and fabricated a rail-guided, Arduino-controlled irrigation system for vegetable crops
- Applied fluid mechanics and machine design principles to improve water distribution
- Conducted field data gathering and performance comparison before and after implementation

Drone Platform Assembly and Detection System Support

- Assembled a multirotor drone platform for testing and experimentation
- Supported hardware integration and basic functional testing
- Assisted in system setup for video and audio-based drone detection using embedded devices

TECHNICAL SKILLS

Mechanical Engineering: HVAC fundamentals and basic airflow concepts; machine design and mechanical component analysis; power plant and industrial systems overview; preventive maintenance and basic mechanical diagnostics

AI & Software: Python, basic C++; AI model testing/evaluation; chatbot prototyping; AI agent workflow design; prompt structuring; technical reporting/documentation

Data & Technical Documentation: Data collection and basic analysis; preparation of technical summaries and reports; documentation and record organization

Operations & Technical Support: Inventory and operational support; coordination with technical teams; workshop and office assistance; customer-facing communication.

Health and Safety: Basic Occupational Health and Safety (BOSH); safety awareness in maintenance and operational environments

EDUCATION

Bachelor of Science in Mechanical Engineering

Manuel S. Enverga University Foundation

2018 – 2024

CERTIFICATIONS

- **Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate**
- **Safety Officer 2 – BOSH Training**
